

Google Sheets CMS

How to manage content on the archive

Edit the spreadsheet below to add tracks, update credits, or change tags. The site picks up changes automatically.

Spreadsheet

docs.google.com/spreadsheets/d/1aMXXwMw9rITdR04_ykHXajCeHc9sG0zZSzPmPrFQWSc

works

Each row is one track.

COLUMN	WHAT TO PUT
<code>title</code>	Track title. Required.
<code>description</code>	Short description shown in the info panel. Optional.
<code>tags</code>	Comma-separated keywords. Must match tags listed in the <i>tags</i> sheet.
<code>year</code>	Release year (e.g. <code>2026</code>).
<code>video_url</code>	Link to the video file.
<code>thumbnail_url</code>	Link to the thumbnail image.
<code>audio_url</code>	Link to a separate audio file. Leave blank if audio is already in the video.
<code>active</code>	<code>yes</code> = visible. Leave blank or write <code>no</code> to hide.

credits

Each row links a person to a track.

COLUMN	WHAT TO PUT
<code>title</code>	The track title, exactly as written in <i>works</i> . Required.
<code>role</code>	Role name (e.g. <code>composition</code> , <code>mixing</code> , <code>mastering</code>). Required.
<code>name</code>	Person or group name. Optional.
<code>active</code>	<code>yes</code> = visible. Leave blank or write <code>no</code> to hide.

tags

Defines which tags are available. Rows here control the filter buttons on the site.

COLUMN	WHAT TO PUT
<code>id</code>	Tag name, lowercase (e.g. <code>ambient</code> , <code>harp</code>). Required.
<code>category</code>	<code>mood</code> or <code>instrument</code> . Required.
<code>active</code>	<code>yes</code> = visible. <code>no</code> = hidden.

Quick how-to

Add a track

Add a row in *works* with a title and tags.
Then add credits for it in *credits* using the same title. New tags need an entry in *tags* first.

Hide a track

Change `active` to `no` . The track disappears from the site. Change it back to `yes` to restore it.
